Telelogic & Comply Serve Sign Five Year Partnership Agreement

United Kingdom – 25th June 2007 Comply Serve Ltd today announced that it has entered into a five year partnership agreement with Telelogic AB concerning the supply of the Telelogic requirements management software product DOORS® for Comply Serve's suit of tools.

Comply Serve is a world leading software company providing compliance solutions for complex, high value projects in highly regulated industries ranging from transport and construction to pharmaceutical and utilities. Comply Serve deliver compliance solutions via the internet using Software as a Service (SaaS) delivery model underpinned by a cost effective subscription based pricing structure. This provides large and complex project teams with easy access to key project data and real time compliance information that is always up-to-date. This enables the project team to make confident decisions based on consistent and valid information and ensures stakeholders are on track to meet client objectives.

Chris Rolison CEO Comply Serve Ltd said, "The agreement cements a relationship that started back in 2005 and in an area of business that is being revolutionized by the way the internet can be used to bring the client and supply chain community together. This agreement is a significant milestone in a partnership with Telelogic that has a very exciting future. DOORS was selected as *the* requirements management solution capable of delivering against the exacting demands our clients face in attaining and maintaining compliance in an increasingly regulated environment and where the costs of non-compliance and project failure are significant."

Nick Bradshaw, Sales & Marketing Director at Comply Serve said, "This is another example of our partnership approach with our supply base who are key to our business. This agreement gives us increased flexibility in delivering cost effective compliance solutions to our clients with minimal IT investment, zero software maintenance and rapid deployment over the internet."

"We are delighted that Comply Serve have selected Telelogic as the only vendor capable of providing a solution that supports the challenges faced by their clients in achieving regulatory compliance", said Anders Lidbeck, President and CEO of Telelogic.

No software - No software maintenance
No systems administration - Minimal IT footprint - Highly intuitive - Affordable - Secure - The fastest route to ensuring that your programme is compliant!

About Comply Serve

Comply Serve Limited is a provider of unique, web-based project and product compliance solutions to clients operating in highly regulated industries. Comply Serve's business focus is in markets where there is a need to address complex compliance and assurance goals on high risk, high value programmes of work ranging from transport and construction to pharmaceutical and utilities. Comply Serve solutions enable projects, often for the first time, to manage complex project compliance needs throughout the project supply chain, delivering significant time, quality and financial advantages. Using a Software as a Service (SaaS) delivery model, a Comply Serve subscription includes access to web-based compliance solutions which can be easily and cost-effectively deployed throughout and across the organisations of project partners. Users of Comply Serve's products and services include; Crossrail, East London Line and a range of UK based multi-disciplinary consultancies (MDCs). For more information, see www.complyserve.com

About Telelogic
